Local Area
Potential contamination of water by acid and other chemicals used particularly in light of the well failure referred to in Jan 2024 newsletter.

Adversane Lane, Billingshurst has gained from the drill being removed and the lack of HGV traffic. That should continue as they suffered from increased noise, light and disruption from the site and HGVs, as well as the wear and tear on the roads. The original estimate of 22% increase in HGV traffic was found from the survey to be 68% as the heavy traffic was not using the Advisory Lorry Network route."/>
