| Comments           | <p>Climate change<br/>Predictions on the adverse effects of global warming are increasingly mounting, and any impact on climate change is a legitimate reason for local government authorities to refuse these types of applications. It is important to act responsibly now and stop hydrocarbon extraction and any impact from methane emissions in Sussex.<br/>WSCC has issued their strategy on climate change, with commitments to net zero by 2030. How will they achieve this with further extensions to oil and gas sites just to see if they can drill for more hydrocarbons within 2 years?<br/><a href="https://www.westsussex.gov.uk/media/17325/climate_change_strategy_2020-2030.pdf">https://www.westsussex.gov.uk/media/17325/climate_change_strategy_2020-2030.pdf</a></p> |
