Dear Sirs

Ref. WSCC/015/18/NH

I am writing to object to the proposed Horsham Incinerator at Warnham.

Surely the BIFFA Mechanical Biological Treatment facility that we have now is enough?

My main objection is to health. Surely the emissions are harmful.

Secondly this is a site with country lanes around it, peaceful blackberry-picking and dog-walking are until recently when the number of huge lorries is spoiling it.

There is a persistent smell in the current buildings, this is not our local rubbish but will come from far afield, the proposed tower is a nightmare, the north Horsham proposed new housing site is too close, and possibly anyhow it will be redundant quite soon.

I feel sure that the disadvantages outweigh the advantages and that ecologically it is a bad idea.

Please do not let this project go ahead.

Yours faithfully,
