FOR THE ATTENTION OF SAM DUMBRELL,  
PLANNING OFFICER

Dear Sir,

Ask yourselves at the  
Planning Department - would you  
like a Recycling, Recovery &  
Renewable Energy facility &  
Ancillary Infrastructure so close  
to your private property? Bearing  
in mind the fumes & smells that  
come around with the existing one.

We have seen the new  
design of the building, not a lot  
smaller than the first & the  
chimney is much the same height.

The residents around the  
area have paid a lot of money

2

for their properties which no doubt will affect the price should they wish to sell. Would there be any compensation for us here?

The traffic generation will increase + affect the safety all around the area.

Most of the comments & issues made in your letter will come into effect.

our family has lived in one of the station cottages for over 65 years & the beauty of the surrounding area to which we live is outstanding. It will be such devastation to us all that live here if the planning should go ahead.

There has been five members of the family that have worked for the Bude works & my husband clocked up 50 years service, mostly of which was spent in the Quarry.

Please be kind enough to take

3

my comments on board + give me  
the courtesy of a reply.

Thanks you.
